

ABDULRAHAMAN SAHABI

Full-Stack Developer

Kebbi State, Nigeria | (+234) 902 301 3619 | abdurahmansahabi559@gmail.com

Portfolio: abdulsahabi.github.io/my-blog | GitHub: github.com/abdulsahabi

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building web applications, business management systems, financial and banking platforms, POS/retail systems, AI/ML-enabled applications, academic and educational systems, and mobile applications. Comfortable working across the stack with JavaScript/TypeScript, PHP, Python, and modern frameworks, from database design through to deployment. Currently developing web applications professionally at InoGr while delivering independent full-stack projects for institutions and businesses.

PROFESSIONAL EXPERIENCE

Full-Stack Developer

October 2024 – Present

InoGr — Part-time

- Designed and developed scalable web applications using Next.js, React.js, and Node.js.
- Implemented Laravel-based back-end APIs with a strong focus on performance and security.
- Integrated MySQL and MongoDB databases to deliver efficient, reliable data storage solutions.
- Optimized applications for SEO, improving search visibility and user engagement.
- Managed version control and collaborative development workflows using GitHub.

SELECTED PROJECTS

InoGr Works — Full-Stack Business & Services Platform

Next.js • Node.js • Laravel • MySQL

- Built and launched a full-stack business and services platform in early 2026.
- Architected the front-end and back-end systems to support scalable multi-service operations.

InovaPOS — Cloud-Based POS & Retail Management System

Laravel • Livewire • MySQL • PWA

- Developed a cloud-based POS platform for retail operations, featuring a virtualized product grid and integrated barcode scanning for fast checkout.
- Built multi-tab split-bill functionality, real-time checkout tracking, and staff privilege management, with a redesigned sidebar interface.

AI-Powered Library Management System

PHP • MySQL • Python (Flask) • Machine Learning

- Developed a library management system integrating a Python-Flask machine learning engine for book recommendations.
- Implemented both collaborative and content-based filtering algorithms to personalize recommendations for users.

NovaPay — Digital Banking & Wallet Platform

PHP • MySQL

- Built a full-stack digital banking and wallet application using plain PHP and MySQL with no external frameworks.
- Engineered core wallet and transaction management functionality to support secure digital payments.

IntelliSummarize — AI Text Summarization System

Python • Flask • NLP

- Built an AI-powered text summarization system as a final-year project for AFUSTA, using Python and Flask.
- Applied NLP techniques to condense long-form text into concise, readable summaries.

ProcureFlow — Digital Purchase Approval System

PHP • MySQL

- Designed a digital purchase approval system to streamline procurement workflows.
- Implemented structured, staged approvals to improve transparency and accountability in purchasing.

AlumniConnect — Alumni Mentorship & Academic Documentation System

PHP • MySQL

- Developed an alumni mentorship platform connecting graduates with current students for guidance.
- Built academic documentation features to support structured record-keeping and mentorship tracking.

Clinic Management System — FUBK

PHP • MySQL

- Overhauled a clinic management system for FUBK, adding role-based access control (RBAC).
- Implemented leave management and notification features to improve staff coordination.

CBT System — Nagari College, Birnin Kebbi

PHP • MySQL

- Led a full rebrand and architectural overhaul of an existing computer-based testing (CBT) system.
- Implemented anti-cheating features, custom institutional branding, and a new landing page.

Smart Video Compressor

React Native • FFmpeg-kit • Zustand • AsyncStorage

- Built a mobile video compression app using React Native with FFmpeg-kit for on-device processing.
- Used Zustand for state management and AsyncStorage for persistent local data handling.

EDUCATION

B.Sc. Computer Science (Ongoing)

2025 – Present

Federal University Birnin Kebbi (FUBK), Kebbi State, Nigeria

National Diploma (ND) in Computer Science

Mar 2022 – Oct 2023

Waziri Umaru Federal Polytechnic, Birnin Kebbi, Kebbi State, Nigeria

- Graduated with hands-on experience in web development, software engineering, and database management.
- Academic projects included a full-stack Online Voting System and a Student Admission Portal.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python

Frameworks & Libraries: Laravel, Livewire, React.js, Next.js, Node.js, React Native

Databases: MySQL, MongoDB

Frontend: HTML, CSS, TailwindCSS, JavaScript

Tools & Technologies: Git, GitHub, Postman, REST APIs, JWT Authentication, npm, Composer

SEO: On-page optimization, keyword research, meta tags, link-building strategies
